

Yashwantrao Chavan College of Science, Karad

Department of Botany

PROGRAM SPECIFIC OUTCOMES (PSO): M.Sc. (BOTANY)

After successful completion of two-year degree program in science students will be able to:

PSO 1	Get high-quality, up-to-date information in the specific fields of Botany.
PSO 2	Learn how to handle a variety of plants and associated issues practically.
PSO 3	Learn both traditional and contemporary taxonomy techniques, identify plants.
PSO 4	Develop business abilities in the context of advanced botany fields.
PSO 5	Provide diverse computational abilities utilized in the realm of Bioinformatics.
PSO 6	Learn about the gene, molecular, cellular, and tissue levels of plant organization.
PSO 7	Create and execute biological projects and experiments, analyze data, and offer insightful conclusions and suggestions.
PSO 8	Solve problems related to food shortage.
PSO 9	Make use of bioresources without seeking financial gain.
PSO10	Become sufficiently proficient in a range of technical and analytical plant science abilities.
