

YASHWANTRAO CHAVAN COLLEGE OF SCIENCE, KARAD

LANGUAGE LAB

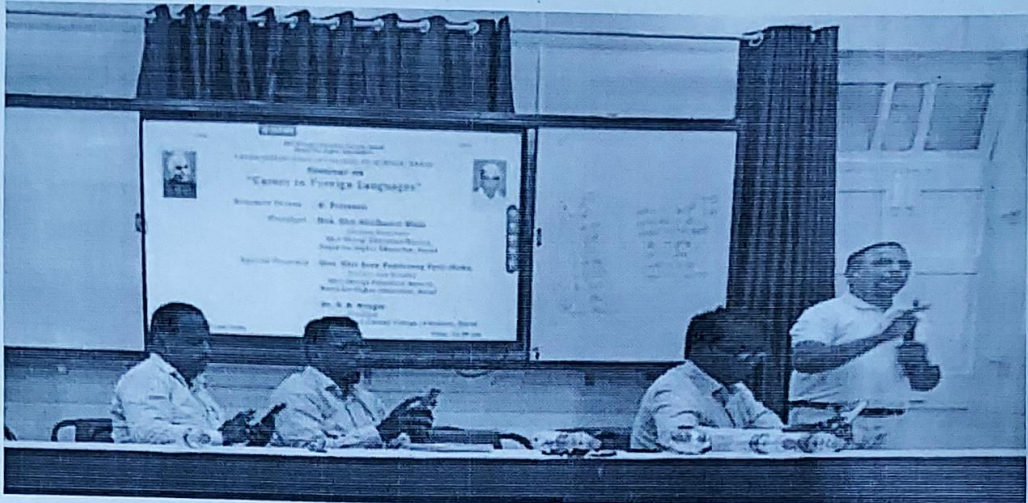

Language Lab Software: Oréll Talk

The language lab has been established recently with 10 personal computer nodes for the students and a server for a teacher to monitor the students' activities. It has also all-in-one printer and headphones for listening.

We have installed renowned **Oréll Talk** software to learn foreign languages with the more focus on English. The software offers structured lessons to the English learners right from the beginner's level through intermediate and advanced levels to the proficient

level. These lessons are divided into Seven such levels based on Common European Framework of Reference for Languages (CEFR).

Hon. Prasanna Kalkumbe guiding students about Japanese language, General Secretary Hon. Altafhusen Mulla, Hon. Member of Management, and Hon. Principal Dr. S. B. Kengar trying to follow the Japanese instructions on their phones.
